UNITED WAY OF LONG ISLAND LAUNCHES "UNITED TOGETHER: A RESPONSE FUND FOR COVID-19"

April 3, 2020 (Deer Park) – United Way of Long Island launched "UNITED TOGETHER: A Re-

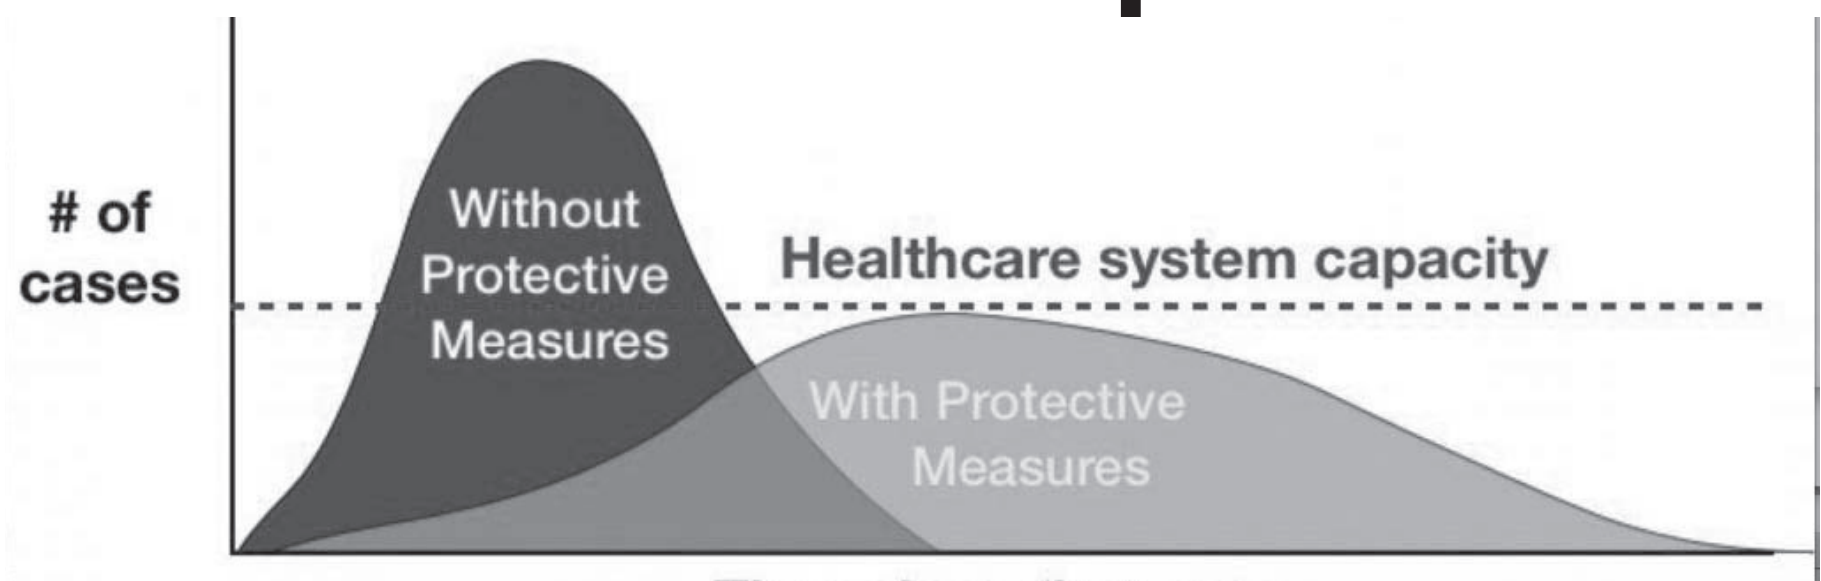

sponse Fund For COVID-19" to help alleviate the disruptions to family life caused by the current

health crisis. To help low-income Long Islanders who are newly unemployed or furloughed due

to the effects of COVID-19, UNITED TOGETHER: A Response Fund For COVID-19 was established. The Fund helps eligible applicants meet their critical basic needs of food and household supplies. Applications to receive help will be accepted beginning Friday, April 3. "We are committed to giving as many families as possible some relief in the form of a gift card. When there is a lack of, or limited income, it can be very difficult to decide what you will have to give up. So we are pleased to be able to help our neighbors when every dollar counts," said Theresa A. Regnante, President & CEO of United Way

of Long Island. She added, "We are grateful to all of our generous supporters who make this fund possible." Interested philanthropic partners should contact United Way of Long Island's President & CEO, Theresa Regnante at tregnante@unitedwayli.org or 631-940-3701, or Chief Development Officer, Craig Fligstein at craig@unitedwayli.org or 631-940-3752. To make a contribution or to learn more about receiving assistance from UNITED TOGETHER: A Response Fund For COVID-19, visit www.unitedwayli.org and click on COVID-19 Response. To give by phone, text "HelpNow" to 313131.

Slow The Spread

Andrew Cuomo, The Governor of New York, stated the chief goal for the State Health Department is now to work out and communicate to all New Yorkers that we

must "slow the spread" of the coronavirus in the general population. He states it can be done with all personal decisions necessary by everyone to 'flatten in the

curve" of the outbreak of new coronavirus cases. By the term, "flattening the curve" it is meant: less new cases per day; per week; per month which in turn pushes

the number of new actual active cases needing health services into the health delivery system later in the Spring and Summer where available health resources

should be there to treat the active cases! Everyone has a role in making this plan a reality. Written & Graph created from CDC Drawing by: Joe Abate
